

ProCurve seminar with networking specialist XMA

XMA would like to invite you to the 'Working Together' seminar that aims to educate its audience into choosing the right networking platform for their institution. Learn about HP ProCurve and how it can reduce costs and improve efficiency in your organisation.

Thursday 9th September 9.30am – 12.30pm, The Mere Court Hotel, Knutsford, Cheshire.

Why choose HP ProCurve?

HP has been an industry leader in the networking infrastructure business for more than quarter of a century and is recognised worldwide for legendary quality and commitment to its customers. HP ProCurve, with its innovative HP ProCurve Networking Adaptive EDGE Architecture™, enables institutions to effectively accommodate the enterprise network as it evolves into a resource that is available anywhere and at any time and which seamlessly adapts to changing requirements.

The last thing network managers need is to spend time configuring complex systems and troubleshooting problems. Because HP ProCurve Networking is based on open industry standards, it's not necessary to be burdened by expensive proprietary products and architectures.

HP ProCurve solutions are reliable and less complex. Rigorous quality testing on all our products has helped achieve solutions that promote reduced costs, better asset utilisation, and increased productivity.

So why attend the Working Together Seminar?

- Learn how HP ProCurve can save money and resource.
- Listen to the experts as they take you through case studies of HP ProCurve.
- Have all your questions explored and answered on the spot.
- An opportunity for networking and relationship building with fellow institutions
- Learn how together, XMA and HP can provide you with the perfect networking solution providing a measurable benefit to your institution
- See how the Networking Framework for Higher Education can benefit your organisation

Best of all, this event is free to attend!

What's the Plan?
